

The Solo
M2, M3 Range

Contemporary
Sleek
Reliable

Versatile passenger seating.

cogent

The Solo **M2, M3**

Comfortable elegance plus weight saving sleekness combine to create ultimate desirability.

All seats are available in a variety of widths and leg heights.

The pioneering design of the Solo range incorporates new 'lite' components - a single seat on 300mm legs with a headrest weighs **only** 11.7kg. Use of anthropometric data has enabled Cogent's R&D team to create a unique, revolutionary, ground breaking design.

Our Solo products are tested with most flooring and fixing systems and are also available with Cogent Automotive **SPRUNG** Technology (**CAST**) as an optional extra.

The Solo can be designed to meet all of our customers' needs from Accessible to Luxury seating.

The Solo has been tested to meet Reg 80 for the Directive currently in force but also meets the Regulation which is due to start in 2014.
